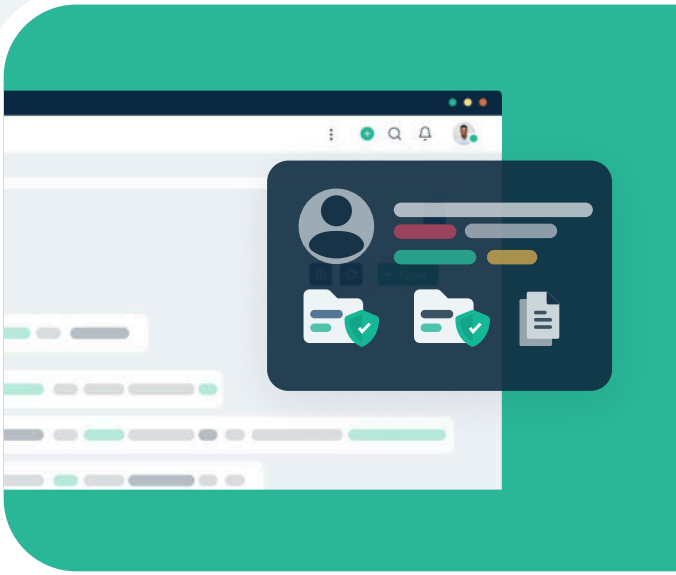
Clarra Case Management for Insurers

A simple and intuitive claims management system to help manage the company's legal, business, and compliance departments



Growing Your Insurance Company

Insurers face challenges in managing high-volume tasks and scaling operations while maintaining quality service. Diversification into new product lines demands new systems, and operational efficiency requires significant technology investment. Integrating data for visibility, handling regulatory deadlines, and implementing flexible billing systems are key challenges, alongside the need for customization and addressing a lack of technical resources. Balancing innovation with customer and regulatory demands is crucial for insurers to remain competitive in a dynamic market.

Clarra Claims Management Optimized for Insurers

Clarra is a cloud-based case management solution optimized to streamline and organize insurers. We help accelerate growth, improve efficiency, and ensure that no deadlines are missed. Learn more about Clarra's capabilities.

Accelerate Growth

Clarra's claims management system efficiently scales with your company's growth, enhancing client care and communication to manage more clients without losing quality. This scalability is crucial for expanding your client base and exploring new lines of business, ultimately improving overall efficiency.

Never Miss Deadlines

Clarra ensures you never miss deadlines with automated reminders and advanced calendar management. It seamlessly integrates with Outlook and Google calendars, alerts you to approaching dates, and guarantees accurate tracking and compliance.

Improve Visibility

With Clarra, gain a comprehensive view of the company and various departments through real-time updates and customizable dashboards that provide detailed insights into claim status and progress. This enhanced visibility facilitates informed decision-making, ensuring each claim aligns with the company's objectives.

Modernize Case Management

Clarra's platform revolutionizes claim management with seamless integrations across over 6,000 applications, eliminating the need for coding. Manage claims, events, and calendars effortlessly while enjoying the flexibility of customizable properties and fields and robust API capabilities.

Why Clarra for Insurance Company Claims Management?

Simple and Intuitive

Clarra simplifies claims management with an intuitive interface and claims-centric dashboards, enabling professionals to focus more on clients and less on administrative tasks. It offers no-code customization with over 6,000 app integrations via Zapier and features like Quicklinks for direct access to essential details. Designed with granular access controls and docketing workflows, Clarra enhances efficiency and ensures compliance.

Optimized for Insurance Companies

Clarra streamlines claim management for insurance companies, offering a comprehensive platform that enhances efficiency across diverse areas. It features centralized claims management, automated workflows, and no-code customization with over 6,000 Zapier integrations. Enhance productivity with Clarra's robust reporting, closed-loop calendaring, and comprehensive event tracking, and join top insurers in optimizing your operations.

Closed-Loop Calendaring

Clarra's Closed-Loop Calendaring system is trusted by top insurers to manage tasks and deadlines effectively, ensuring nothing is overlooked. Clarra's Events and ClarraDocs features collaborate to track case events and automatically update timelines with the latest deadlines from government agencies and corresponding law firms, reducing missed deadlines and eliminating compliance risks. Closed-loop calendaring provides integrated document management, audit-ready calendaring for transparency, and custom reporting for insightful analytics, enhancing claims management and operations.

Seamless Integration

Accelerate integration with other applications with Clarra's REST-based public API and tight integration with Zapier. Our public API and documentation allow technical administrators to test our API and shorten development time. Our integration with Zapier allow administrators to integrate Clarra with more than 6,000 applications and automate workflows with no coding. Clarra streamlines workflows, supports advanced automation, and offers strategic integrations for efficient operation, allowing you to focus more on client needs and less on administrative tasks.

No-Code Customization

Clarra revolutionizes your agency's workflows by enabling self-service customization without the need for coding. Customize data properties, fields, and access controls to align precisely with your agency's needs, enhancing security and operational efficiency. This no-code approach simplifies self-service customization, boosting efficiency and growth without technical barriers.

Rapid Transformation

Customize Clarra's global properties to align with your specific terminology and claim management requirements. Take advantage of Clarra's flexibility to develop custom features that meet your unique needs, facilitating rapid adaptation. Clarra can be adapted to manage various business and legal applications such as claims management, licensing, contract management, project management, and records management, all without the need for coding.
