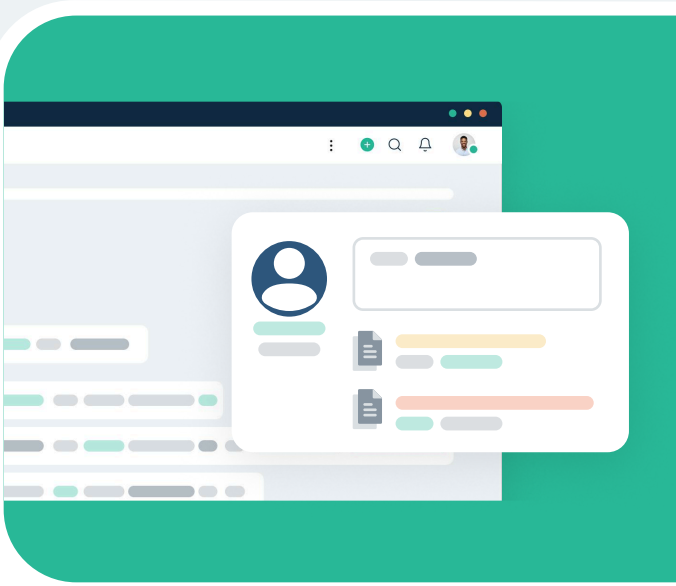
Clarra Case Management for Public Insurance Adjusters

Expand your public insurance adjuster firm and improve caseload efficiency



Growing Your Public Insurance Adjuster Firm

Public insurance adjusters navigate challenges such as managing high-volume tasks, scaling operations to respond to emergencies and natural disasters, and expanding into new specialties without sacrificing service quality. Efficient operations enable growth and better customer service. Key challenges include maintaining operational visibility, handling complex billing, and meeting diverse client needs with robust calendaring tools and high-service customization. Continued investment in technology and training is crucial for adjusters to efficiently manage growth and remain competitive in the dynamic insurance market.

Clarra Case Management Optimized for Public Insurance Adjusters

Clarra is a cloud-based case and claim management solution optimized to streamline and organize public insurance adjusters agencies. We help accelerate growth, improve efficiency, and ensure that no deadlines are missed. Learn more about Clarra's capabilities.

Accelerate Growth

Clarra's case management system efficiently scales with your firm, enhancing client care and communication to manage more clients without losing quality. This scalability is crucial for growing your client base and exploring new business categories, ultimately improving overall efficiency.

Never Miss Deadlines

Clarra ensures you never miss deadlines with automated reminders and advanced calendar management. It seamlessly integrates with Outlook and Google calendars, alerts you to approaching dates, and guarantees accurate tracking and compliance.

Improve Visibility

Clarra's contract and client management system efficiently scales with your company, enhancing collaboration and communication to manage more projects without compromising your clients' objectives. Clarra is crucial for growth and exploring new business opportunities.

Modernize Case Management

Clarra's platform revolutionizes case management with seamless integrations across over 6,000 applications, eliminating the need for coding. Manage claims, events, and calendars effortlessly while enjoying the flexibility of customizable properties and fields and robust API capabilities.

Why Clarra for Public Adjuster Claim Management?

Simple and Intuitive

Clarra simplifies public adjuster claims management with an intuitive interface and claim-centric dashboards, enabling professionals to focus more on clients and less on administrative tasks. It offers no-code customization with over 6,000 app integrations via Zapier and features like Quicklinks for direct access to essential details. Designed with granular access controls and docketing workflows, Clarra enhances efficiency and ensures compliance.

Optimized for Public Insurance Adjusters

Clarra streamlines claim management for public insurance adjusters, offering a comprehensive platform that enhances efficiency across diverse areas. It features centralized claims management, automated workflows, and no-code customization with over 6,000 Zapier integrations. Enhance productivity with Clarra's robust reporting, closed-loop calendaring, and comprehensive event tracking, and join top agencies in optimizing your operations.

Closed-Loop Calendaring

Clarra's Closed-Loop Calendaring system is trusted by top agencies to manage tasks and deadlines effectively, ensuring nothing is overlooked. Clarra's Events and ClarraDocs features collaborate to track claim events and automatically update timelines with the latest deadlines from government agencies and corresponding law firms, reducing missed deadlines and compliance risks. Closed-loop calendaring provides integrated document management, audit-ready calendaring for transparency, and custom reporting for insightful analytics, enhancing firm operations.

Seamless Integration

Accelerate integration with other applications with Clarra's REST-based public API and tight integration with Zapier. Our public API and documentation allows technical administrators to test our API and shorten development time. Our integration with Zapier allow administrators to integrate Clarra with more than 6,000 applications and automate workflows with no coding. Clarra streamlines workflows, supports advanced automation, and offers strategic integrations for efficient operation, allowing you to focus more on client needs and less on administrative tasks.

No-Code Configuration

Clarra revolutionizes your firm's workflows by enabling self-service configuration without the need for coding. Customize data properties, fields, and access controls to align precisely with your firm's needs, enhancing security and operational efficiency. This no-code approach simplifies self-service configuration, boosting efficiency and growth without technical barriers.

Rapid Transformation

Customize Clarra's global properties to align with your firm's specific terminology and claim management requirements. Take advantage of Clarra's flexibility to develop custom features that meet your unique needs, facilitating rapid adaptation. While optimized for litigation, Clarra can be adapted to manage various legal applications such as claims management, licensing, contract management, project management, and records management, all without coding.
