Secure Case Management with Clarra

Safeguard confidential legal data with advanced security measures

Clarra's security policies and controls robustly protect your firm's sensitive communications and data integrity, ensuring full-scale protection across all levels of your legal operations.

Why Opt for Clarra for Secure Collaboration?

Scale Efficiently

Clarra's scalable system lets your firm handle growing caseloads without sacrificing service quality, essential for expanding your client base and market presence.

Boost Productivity

Clarra automates routine administrative tasks, converting time-consuming manual processes into streamlined operations. This shift allows lawyers to focus on substantive legal work, boosting productivity and cutting costs.

Gain Comprehensive Insights

Keep a strategic overview of all your cases with real-time updates and customizable dashboards from Clarra. These dashboards offer crucial insights into case status and operational metrics for informed decision-making.

Meet Every Deadline

Stay on top of critical deadlines with Clarra's automated reminders and advanced docket management, which accurately integrates with court rules and calendars.

Streamline Case Management

Manage diverse caseloads efficiently using Clarra's intuitive platform. Its user-friendly interface ensures that all team members effectively handle their responsibilities.

Modernize Your Practice

Transform case management with Clarra's modern platform. It easily synchronizes with over 6,000 applications without coding, enhancing flexibility and integration capabilities.

Reduce Costs

Cut costs associated with traditional case management systems. Clarra offers a cost-effective solution that minimizes data security, cloud hosting, and software development expenses.

Secure Your Legal Practice with Clarra's Advanced Collaboration Features

Enhance Security with Robust Authentication

Clarra enhances your security posture by supporting Multi-Factor Authentication (MFA) and seamless integration with Google and Microsoft logins. This ensures that only authenticated and authorized users can access your Clarra account.

Implement Roles-Based Access Control

Clarra enables precise access management with granular roles-based access controls (RBAC). Customize over eighty permissions for various user roles such as attorneys, paralegals, and IT staff, tailoring access to your firm's specific requirements.

Control Access with Matter Access Controls

Manage access to case information effectively with Clarra's Matter Access Controls. Restrict access based on user, team, or group to enable secure collaboration while maintaining strict confidentiality.

Strengthen API Security

Clarra protects your data exchanges with stringent API security protocols. Our secure, well-documented APIs prevent vulnerabilities and ensure safe connectivity with your essential business applications.

Encrypt Data with Military-Grade Standards

Clarra encrypts all data at rest and in transit using military-grade standards to protect your client's information from external threats and breaches and maintain data confidentiality and integrity.

Ensure Compliance with Compliant Infrastructure

Clarra's services are hosted in Microsoft Azure data center services that meet SOC 2, HIPAA, and ISO 27001 standards, ensuring our infrastructure supports robust security measures and compliance.
