Customize Clarra Case Management Without Coding

Empower your legal practice with self-service customization tools

Streamline Case Management with No-Code Customization

Clarra revolutionizes how legal teams manage their workflows by eliminating the need for complex coding. Discover how professionals can effortlessly customize their systems to enhance operational efficiency.

Custom Fields

Clarra allows you to tailor your case management experience with customizable fields. Create bespoke fields for matters, contacts, and more, enabling users to conform the platform to the firm's protocols and procedures without writing a single line of code.

Data Properties

Configure and manage case-related data with Clarra's user-friendly properties. Easily define data parameters to align with your unique case management processes, ensuring accurate capture and categorization of all relevant information.

Access Controls

Clarra maximizes security and operational efficiency with robust access control settings. Define who can view or edit case information, safeguard sensitive data, and ensure team members have the necessary access to perform their roles effectively.

Tailor the Platform to Your Needs

Originally designed for complex litigation, Clarra can be customized to manage a variety of cases, including claims management, licensing and rights management, contract management, project management, and records management—all without coding.

Integration

Seamlessly connect Clarra with a wide array of applications. With no-code integration options, link your case management system to over 6,000 apps through Zapier, facilitating cross-functional cohesion and enhancing your firm's legal service delivery.

Empower Your Firm

Clarra's no-code customization is a game-changer in legal tech. Without needing technical expertise, your firm can now personalize case management to fit seamlessly with existing operations, paving the way for enhanced efficiency and growth.
